Hi! April fifteenth, Friday, '77. The high school brought a bake sale. Mmmmm! Yum! The stuff they brought included cupcakes, brownies, cookies, cakes, etc. And we have book reports and Star for the Day. Wait! The Star for the Day is the most main character of the second grade class. We even have book reports and behavior stars. You have to behave to get a behavior star. Every ten stars you get some gum. In science we are making cages for animals. In math I finished my second grade arithmetic book, and now I am on my third grade arithmetic book. -Laith

I like this school because it has a nice big playground. We play in the car sometimes and we play in the treehouse sometimes. In math we are reviewing, in music we are listening to records, in English we are making advertisements, and in reading we are reading Fiesta. -Brad

FOURTH GRADE

Fairhaven is my kind of school. It's where I learn to read and write, it's where I meet my friends and have fun. We climb in the trees and pretend we are army men, and we chase the dog-his name is Mug. -Mark

FIFTH GRADE

When I first came to this school I thought that the school was very nice, the teacher Mrs. Pollock was very nice to me but the children were not so nice. Maybe it was because I did not know a word of English and couldn't communicate with them. A girl named Caroline was especially mean and she was always getting everyone to turn against me. It's strange to say but later she turned out to be my very best friend. I was also a bit scared because I knew I wouldn't be able to speak to them. All the way to school I worried about not making friends. Sometimes it's not good to worry too much over something because it comes true. So when I got to school I made no friends. But my teacher was very kind to me and recess she gave me books to look at, so I stopped worrying about not having friends and looked at the books. Little by little I began to learn English. At Christmas I became ill and my teacher sent me a crocodile tooth and ancient rock. I thanked her as soon as I was able to go to school again. At the end of the year I could communicate perfectly with other children and I had quite a few friends. One day in assembly I got a clay pitcher and on it was written "Youngest, cutest student, to learn English this year." I treasure the pitcher because it reminds me of the school. Second and third grade passed away pleasantly. In fourth grade I had Marty Belal as a teacher. She has twinkling blue eyes and blond hair. She is a good teacher, kind but strict. I think fifth grade is easy. I am very happy to do my homework quickly and then read a book or two before going to bed. Truly books are your friends. It's strange, but whenever I step into the school I feel very happy. -Diana

Sixth grade is neat. Because if you do something wrong you wouldn't be punished or screamed at. And if you have a problem, people will help you and not call you a weirdo or a dummy. Sixth grade is also nice because you work in a group and help other people, and when they say "Thanks for helping me" it kind of makes you feel good. The sixth grade classroom isn't dull, but it is bright and colorful. -Ossama

Being a seventh grader is a privilege for me because some kids in the world do not have school. In my life I have never been in a school like Schutz. Seventh grade is fun part of the time but other times you have to work very hard. What you learn is up to you. If you do not pay attention it is your own fault because the teachers teach you a real lot. -Mark

It's not bad to be an eighth grader. It is the last year of junior high. It's a bummer because eighth graders don't get free periods. We do get into some trouble but that's life . . . I would rather be in ninth grade but I have to wait. -Imad
